

AESTHETE WELLNESS

Skin & Hair IQ

Skin, hair and scalp imaging system

4 modes
Assessment functions

9 image views
Spectral imaging

Visual reports
Compare and review

A closer view.
A clearer consultation.

Skin & Hair IQ combines full-face imaging, microscopic inspection and scalp assessment with visual reporting tools in one consultation platform.

Key Features

Assessment modes

Face, microscopic, scalp and sunscreen imaging

Image views

9 spectral image views

Analysis categories

Acne, sensitivity, pigmentation and aging

Microscopic lighting

White, cross-polarized and UV

Comparison

Side-by-side image review

Reports

Individual and comprehensive reports

Three-part setup

A facial imaging unit, separate display and handheld inspection probe bring overview and close-up imaging together.

Record images. Review details. Share a clear visual report.

From image to insight.

Different illumination and image-processing views reveal complementary visual information. Comparison and reporting tools help organise that information for consultation.

1

Capture

Full-face and close-up imaging

2

Compare

Light-source and date comparisons

3

Report

Structured image-based summaries

Multiple ways to view the skin

White light

A familiar view of visible skin appearance.

Polarized light

Cross and parallel views support review of colour and surface texture.

UV imaging

Fluorescence-based views add another perspective.

Processed maps

Red, brown and pigment views organise image features.

03 / APPLICATIONS

See the detail. Track the change.

Visual assessment and comparison tools for skin and scalp consultations.

Consultation Tools

1. **Skin assessment**

   Review images across acne, sensitivity, pigmentation and aging categories.

2. **Scalp & hair review**

   Inspect the scalp and follicles with microscopic images and scalp reports.

3. **Sunscreen imaging**

   Compare images before and after application and across time points.

4. **Progress review**

   Use image comparisons, annotations and shareable or printable reports.
