

AESTHETE WELLNESS

RollVyra IR

Infrared roller massager

3 heat levels

Adjustable warmth

3 speed levels

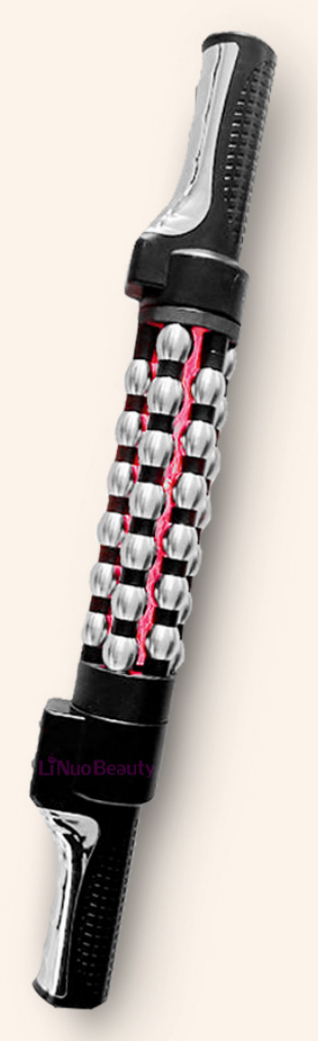

Rotary massage

Dual handles

Integrated controls

Warmth in motion.

RollVyra IR combines electric rotary massage with adjustable heating. A textured roller section sits between two handles, with heat and speed controls built into the body.

Specifications

Massage action

Electric rotation

Heating

3 adjustable levels

Speed

3 adjustable levels

Level indicators

Blue / green / red

Adapter rating

12 V / 5 A

Construction

Dual handles and roller beads

Designed for a controlled grip

The two-handle format supports a steady hold, while the central roller section delivers the massage action. Separate controls make heat and speed easy to distinguish.

Heat meets rotation.

A rotating bead surface provides mechanical massage, paired with three selectable heating levels. Heat and speed each have their own control and indicator.

Rotary massage

The bead-covered section rotates to provide moving contact.

Adjustable heat

Three levels allow the warmth setting to be selected independently.

Controls at a glance

Heat control

Dedicated button and indicator for the heating level.

Speed control

Separate button and indicator for the rotation speed.

Colour-coded levels

The same indicator colours identify the three levels for both functions.

- **Low**
- **Medium**
- **High**

A hands-on approach to body massage.

Body massage

A handheld roller format combining moving contact and adjustable warmth.

Product Details

1. **Roller surface**
   Rounded beads form the central massage section.

2. **Dual grip**
   Handles at both ends provide a balanced holding position.

3. **Power connection**
   An external 12 V / 5 A adapter powers the device.
